

Claims

I claim

1. A device, comprising:
 - (a) a base
 - (b) an elongated article with a sharp tip
 - (c) means for attaching said device to a water cooler
2. Said elongated article with a sharp tip of claim 1 is sharp enough to puncture a bottle's cap
3. Said elongated article with a sharp tip of claim 1 is of sufficient length allowing the puncturing of a bottle's cap
4. Said elongated article with a sharp tip of claim 1 is of sufficient strength to withhold the weight and pressure of a bottle full with water placed on said device of claim 1
5. Said device of claim 1 is an independent structure
6. Said device of claim 1 is an integral structure of a water cooler
